**Security In A Topsy Turvy World...**

Probably at no other time in America are people as insecure about their lives, futures, families, and overall welfare as they are today. At the same time, there are more and more people advertising and proclaiming that they have the answer to security in life. As we cover this topic, it is our prayer that we examine our lives before God and find out:

- ❖ what He says we can be secure in, and
- ❖ where we can find that security.
